- **The WATER service is a commodity and it is taxed.**
- **ServLine is an optional program for residential households only that is automatically included as a line item on your water bill at a cost of \$2.25 per month, price subject to change as necessary. This program will cover water leaks up to \$1000.00 on the water portion of your bill excluding the customer's average bill. Any dollar amount that goes over \$1000.00 that ServLine does not pay, the customer is responsible for. If the customer chooses not to participate in the ServLine program, they may opt out at any time, however, the customer will assume full responsibility for their leaks and payment is expected by the bill stated due date. There is also an additional, optional \$5.50 per month for your water line protection, protecting your water line from the meter to the foundation of your home. As mentioned above, ServLine is an optional program, customers who decline the ServLine Program will not be allowed any adjustments for water leaks and payment arrangements will not be accepted. ServLine does not cover the City Sewer portion of your bill. More information is available in the water department by calling or visiting Niota Waterworks Department or the ServLine claims Department at 423-617-0999.**

--There will be an assigned percentage rate increase every July 1st to keep up with inflation costs, etc., and is subject to change per the Board of Commissioners--

--There will be an automatic increase to mirror an increase by AUB, our water provider---
